6 layers / 1.6 mm / controlled-impedance USB 90 Ω differential pair

STRAPPING PINS:

**GPIO0: At reset HIGH = SPI Boot.**

**LOW + GPIO46 LOW = Joint Download Boot.**

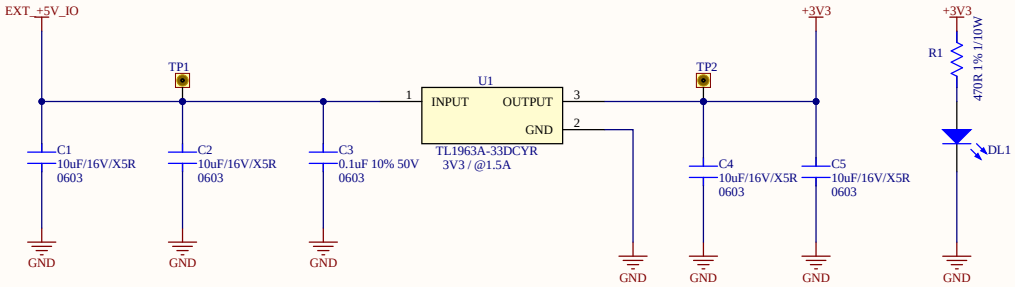

**GPIO3: If the STRAP_JTAG_SEL eFuse is enabled, LOW at reset selects external JTAG on GPIO39-GPIO42.**

**GPIO45: At reset If EFUSE_VDD_SPI_FORCE is not set:**
**LOW = VDD_SPI 3.3 V / HIGH = VDD_SPI 1.8 V**

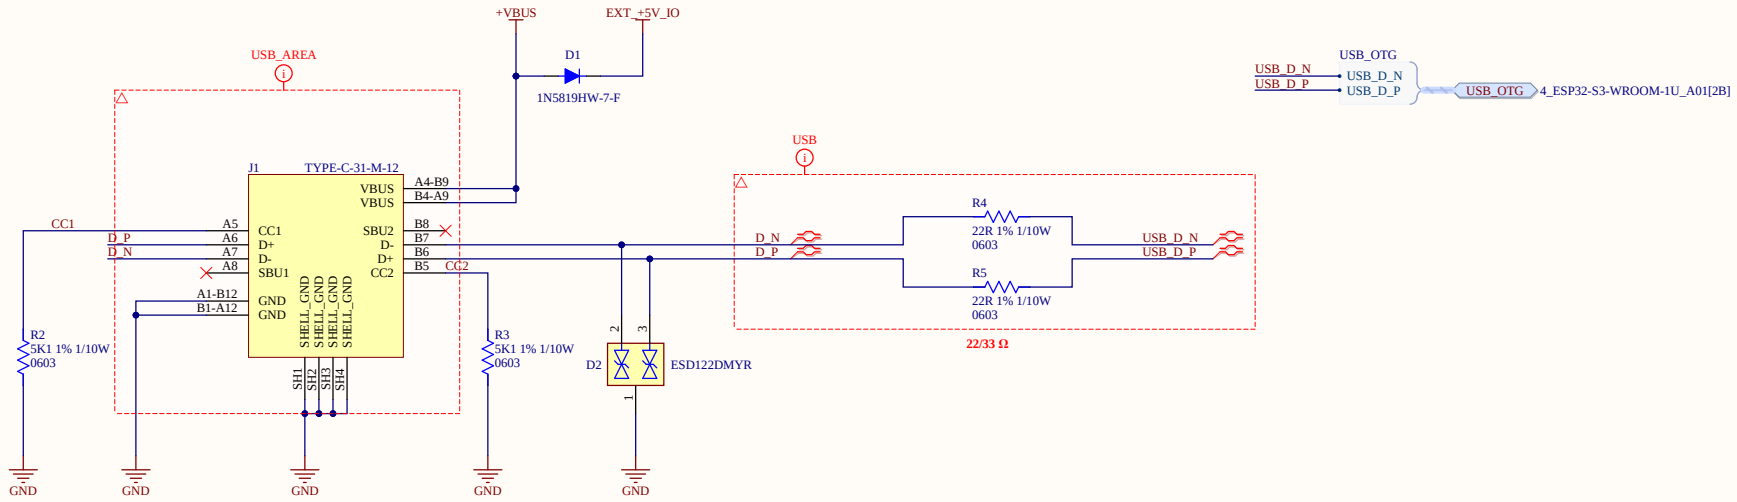

**GPIO46: At reset, LOW is required together with GPIO0 LOW for Joint Download Boot.**
**When GPIO0 is HIGH, GPIO46 is ignored.**

After reset, these pins operate as normal GPIOs.
